(a) Fixing of Bond and Insurance; Contents of Permit. The city council within sixty (60) days after the filing of the application for a permit to drill a well or install a trunkline or pipeline or any primary system for the production of oil, gas and condensate shall determine whether or not the application complies in all respects with the provisions of this article; and if it does so comply, the city council shall fix the amount of the principal of the bond and insurance provided for herein, and shall issue a permit for the drilling of the well or the installation of the facilities for which application has been made. Each permit shall:

- (1) By reference have incorporated therein all the provisions of this article with the same

Brownfield Code of Ordinances

force and affect as if this article were copied verbatim in such permit;

- (2) Specify the location of the proposed well and all pipelines with particularity to lot number, block number, name of addition or subarticle, section line or other available correct legal description;
- (3) Contain and specify that the term of the permit shall be for a period of one year from the date of the permit and until such time as the permittee has permanently abandoned the operation of such well or facility for which the permit was issued;
- (4) Contain and specify such other terms and provisions as may be necessary in a particular case to accomplish the purposes of this article;
- (5) Specify the total depth to which the well (if any) may be drilled, not exceeding the proposed depth;
- (6) Contain and specify that no actual operation shall be commenced until the permittee shall file and have approved an indemnity bond in the designated principal amount as so determined by the city council or has complied with Section 4.311 herein.

(b) Factors Considered. In determining whether to grant or deny any application for a permit required by this article and in determining the conditions and provisions to be contained in any such permit, the city council shall include in its consideration the following factors:

- (1) Whether the proposed facility will comply with all provisions of this article;
- (2) Whether the proposed facility will conflict with the comprehensive plan for physical development of the city;
- (3) Whether specific sites have been designated on plats of the property in the area concerned for such oil and gas facilities as are the subject of the application;
- (4) Whether for any reason, the proposed facility will constitute a hazard to property or persons.

In acting on any such application, the city council shall determine whether the application complies with or is consistent with the above listed criteria as of the time of the granting or denying of the permit and not as of the time of the making of the application for such permit.

(c) Signing of Permit. Such permit in duplicate originals, shall be signed by the oil and gas inspector and prior to delivery to the permittee, shall be signed by the permittee (with one

original to be retained by the city and one by the permittee) and when so signed said permit shall constitute the permittee's drilling and installation license, as well as the contractual obligation of the permittee to comply with the terms of such permit, bond and of this article. The issuance of a permit pursuant to the provisions of this article constitutes a contract between the city and the permittee in that the permittee shall be liable and must pay the reasonable attorney's fees and costs incurred by the city in a successful enforcement of the provisions of this article.

(d) Changes in Conditions Subsequent to Granting of Permit. Once a permit has been granted by the city council, any subsequent change of conditions not under the control of the permittee shall not require any action on the part of the permittee to improve or change his existing facilities if such existing facilities complied with the provisions of the article before the said change of conditions. However, the preceding sentence does not apply to facilities which are actually abandoned or relocated for whatever reason, in which case such relocated facilities must comply with all provisions of this article.

(1965 Code of Ordinances, Chapter 13, Section 13-6)

Sec. 4.307 Suspension or Cancellation of Permit

In the event of the failure of the permittee to comply with any provision of this article, the oil and gas inspector shall issue a written notice to the permittee of the nature of the noncompliance and stating such reasonable time necessary to gain compliance. After lapse of such reasonable time, the city council may suspend the permit for a period of time or cancel the permit. (1965 Code of Ordinances, Chapter 13, Section 13-7)

Sec. 4.308 Supplemental Permit for Deep Drilling

(a) Application. Once any well has either been completed as a producer or abandoned as a dry hole, it shall be unlawful and an offense for any person to drill such well to a deeper geological formation than that reached in the prior drilling operations without the permittee as to such well obtaining a supplemental permit after filing a supplemental application with the city secretary specifying:

- (1) The condition of the well and the casing therein;
- (2) The depth to which it is proposed such well be deepened;
- (3) The proposed casing program to be used in connection with proposed deepening operations.

(b) Filing Fee. In the event the oil and gas inspector is satisfied that such well may be

deepened with the same degree of safety as existing in the original well, a supplemental permit may be issued without additional filing fee to the permittee authorizing the deepening and operation of the well to such specified depth as applied for, provided the derrick and drilling equipment have not been removed from the drill site. In any deeper drilling or any deeper completion of any deeper production operations, the permittee shall comply with all provisions contained in this article and applicable to the drilling, completion and operations of a well or wells. If the operator has removed the derrick and drilling equipment from the location, the supplemental permit shall comply with the requirements specified for a permit in Section 4.305 of this article.

(1965 Code of Ordinances, Chapter 13, Section 13-8)

Sec. 4.309 Permit Required for Conduits on Streets and Alleys

(a) Written Permission Required. No permittee shall make any excavation for any purpose or construct any lines for conveyance of fuel, water or minerals on, under or through the streets and alleys of the city without express permission of the oil and gas inspector in writing, and then only in strict compliance with the ordinances of the city; provided however, that emergency repairs may be made without such permission when in the good faith opinion of the permittee the delay required to obtain written permission would involve a hazard to person or to property, but permittee shall notify the city as soon as possible thereafter.

(b) Maximum Gauge Pressure in Gathering Lines and Flow Lines; Location of Lines to be Approved. The gathering lines and flow lines hereinafter installed in the corporate limits of the city, for the purpose of transporting oil, gas and/or water in conjunction with the operation of any well, tank or tank battery or injection or gathering system are hereby limited to a maximum operating gauge pressure of two hundred fifty (250) pounds per square inch unless otherwise specifically approved by the oil and gas inspector. The location of any such gathering lines and flow lines if not specified in the permit, must be specifically approved by the oil and gas inspector.

(c) Testing of Pipeline. The pipeline shall be tested prior to being placed in service to one hundred fifty (150) percent of expected operating pressure, but not less than one hundred (100) pounds per square inch.

(d) Plot Plans Showing Location of Pipelines Required. The companies responsible for any and all pipelines now in existence or hereinafter installed within the city limits are hereby required to furnish the city with an "as built" plot plan showing the location of all their facilities for permanent record with the city.

and the franchised distribution system of electric light and power companies, designed or utilized to transport oil, gas or water in connection with the production and transportation of oil and/or gas shall hereafter be installed with the minimum of cover or backfill specified by the then applicable ANSI Code for such pipelines. The oil and gas inspector is authorized to approve a lesser cover or specify a greater cover or backfill in special cases when in the opinion of the oil and gas inspector such variation is advisable and/or will not increase the degree of hazard.

(f) Construction in Right-of-Way to Conform to City Ordinances. The requirements for construction in public right-of-way must conform to such ordinances of the city regulating such construction.

(g) Written Permission Required to Dig up, Obstruct, Etc., Streets. The digging up, breaking, excavating, tunneling, undermining, breaking up or damaging of any street as herein defined, or the leaving upon any street of any earth or other material or obstruction shall not be permitted unless such person shall first have obtained written permission from the city manager; provided however, emergency repairs may be made without such permission when in the good faith opinion of the permittee the delay required to obtain such written permission would involve a hazard to person or property, but permittee shall notify the city as soon as possible thereafter and shall be liable for any damages occurring.

(h) Determination of Placement, Location, Depth, Separation of Lines. The oil and gas inspector is authorized to determine placement, location, depth and separation of line requirements in accordance with accepted industry standards.

(1965 Code of Ordinances, Chapter 13, Section 13-9)

- (B) Effective Date and Conditions. Such bond shall become effective on or before the date it is filed with the city secretary and will remain in force and effect for at least a period of six (6) months subsequent to the expiration of the term of the permit issued, and in addition, the bond will be conditioned that the permittee will promptly pay all legally imposed fines, penalties and other assessments imposed upon permittee by reason of his breach of any of the terms, provisions and conditions of this article and that the permittee will promptly restore the streets and sidewalks and other public property of the city which may be disturbed or damaged in the operations to their former condition, and that the permittee will promptly clear all premises of all litter, trash, waste and other substances used, allowed or occurring in the operations and will, after abandonment or completion, grade, level and restore such property to the same surface conditions as nearly as possible to those which existed when operations

were first commenced and that the permittee will indemnify and hold the city harmless from any and all liability growing out of or attributable to the granting of such permit. If at any time the city council shall deem any permittee's bond to be insufficient for any reason, it may require the permittee to file a new bond.

- (C) Reduction or Increase of Bond. If after completion of a producing well or any facility or pipeline for which a bond is required by this article and if the permittee has complied with all the provisions of this article such as removing derricks, clearing premises, erection of fences, etc., he may apply to the city council to have the bond reduced to a sum of not less than ten thousand dollars (\$10,000.00) on each well or facility for the remainder of the time the well produces or the facility is operated without reworking. During major well work over or in-hole remedial operations requiring the use of a rotary rig and/or high pressure injection equipment (such as deepening, cementing, bracing, re-perforating, etc.), the amount of the bond shall be increased to the original amount. A trunkline pipeline installation shall not be considered as completed until the lines have been tested and have been in operation for a period of thirty (30) days.

 - (ii) Property damage, two hundred thousand dollars (\$200,000.00).
- (B) Filing of Duplicate Copies of Policies Required. Permittee shall file with the city secretary duplicate original copies of policies of insurance as above stated and shall obtain the written approval thereof by the oil and gas inspector who shall act thereon within ten (10) days from the date of such filing.
- (C) Notice of Cancellation Required. The insurance policy or policies shall not be canceled without written notice to the city secretary at least ten (10) days prior to the effective date of such cancellation. In the event such insurance policy or

policies are canceled, the permit granted shall terminate and the permittee's right to operate under such permit shall cease until permittee files additional insurance as provided herein.

- (D) Reduction of Insurance. If after completion of a well or pipeline permittee has complied with all the provisions of this article such as removing derrick, completion of the pipeline, clearing premises, etc., he may apply to the oil and gas inspector to have such policies reduced as follows:
- (i) Bodily injuries, fifty thousand dollars (\$50,000.00) for one person; one hundred thousand dollars (\$100,000.00) for an accident.
